Linear actuators Herkules

Description · Applications · Options

The linear actuators of the Herkules series have the following outstanding features:

- Combination of high pushing/pulling forces and low space requirement
- High static load capacity
- High impact resistance
- Low maintenance lubrication system
- Protection against dirt, dust and other environmental influences
- Suitable for heavy-duty applications

Applications

- Lifting platforms
- Locking devices
- Tilting devices
- Slat adjustment
- Points switching and many other applications.
